Static Electricity Activity

WHAT YOU NEED

EMPTY ALUMINUM CAN

... or a metal tablespoon.

BALLOON

Filled with air.

WOOLEN OR FLEECE CLOTH

A small blanket.

DARK ROOM

... with clear path to the light switch.

DIRECTIONS

ZAP! STATIC ELECTRICITY!

Inflate the balloon. Rub the balloon on either the wool or your hair for thirty seconds. Cut the lights off, then touch the metal spoon to the balloon to see what happens.

OR TRY THIS

Take the woolen/fleece blanket and put it over your head. Slowly pull the blanket downward, dragging it across your hair. Do you hear the static?

THE SHOCKING SCIENCE

The popping sound is static discharge. Lightning is also an example of static discharge. A cloud gets a very huge charge by clashing with other clouds. It gives off the excess charge to the ground.

STEP 3

Slowly turn the rain stick upside down. Alternate to make the sound of rain.

A foley artist is someone who uses everyday items to recreate the natural ambient sounds for film and TV. Our everyday objects make a sound that sounds like rain. What are some different ways you could make storm sounds?
